

DUKERLIN CHERESTAL

Information System Security Manager (ISSM) | RMF Lifecycle Lead | Active DoD Secret Clearance

Cleared Cybersecurity Professional | NIST 800-53 | eMASS | ATO Sustainment | Aerospace & Defense

PROFESSIONAL SUMMARY

Cleared Information System Security Manager (ISSM) with 11+ years supporting mission-critical aerospace and defense systems in highly regulated environments. Lead contributor to RMF lifecycle execution, ATO sustainment, and continuous monitoring efforts. Experienced in managing security artifacts in eMASS, driving NIST 800-53 control remediation, and strengthening audit readiness across cross-functional teams. Operationally grounded cybersecurity leader capable of aligning compliance requirements with real-world production systems. Master of Science in Information Technology Management.

CORE COMPETENCIES

- Risk Management Framework (RMF) End-to-End Support
- ATO Preparation & Sustainment
- eMASS Artifact Management
- NIST 800-53 Control Implementation & Remediation
- POA&M; & SSP Development
- Continuous Monitoring Strategy
- Cleared Defense Environments
- Cybersecurity Governance & Compliance

PROFESSIONAL EXPERIENCE

Crane Aerospace & Electronics | 2015 – Present

Information System Security Manager (ISSM) Support (2025 – Present)

- Drive RMF lifecycle support activities for defense systems operating under DoD compliance requirements.
- Manage and maintain security documentation in eMASS supporting ATO packages and continuous monitoring.
- Lead coordination of NIST 800-53 control remediation efforts across engineering and IT stakeholders.
- Support SSP development, POA&M; management, and security impact analysis documentation.
- Enhance audit readiness and compliance posture across multiple departments supporting defense contracts.

Senior Machine Operator | Cross-Functional Operations Leader

- Promoted from entry-level to Senior Machine Operator, demonstrating sustained performance and leadership.
- Cross-trained across 8+ regulated aerospace manufacturing processes, ensuring operational continuity.
- Managed hazardous material compliance (40-hr HAZWOPER) and supported TPM reliability initiatives.
- Collaborated with engineering, quality, and supply chain teams to resolve issues impacting delivery timelines.

Cyber Process Automation & Modernization Contributor

- Designed automation and reporting solutions using Power Apps, Power Automate, and Power BI.
- Digitized manual tracking workflows, improving visibility and response time across operations.
- Enabled data-driven decision-making through centralized dashboards and workflow automation.

EDUCATION

- Master of Science – Information Technology Management (2026)
- Bachelor of Science – Business / Management Information Systems (2022)
- Associate of Science – Computer Information Systems / Information Assurance (2015)

CERTIFICATIONS & CLEARANCE

- Active DoD Secret Clearance
- Graduate Certificate – Cybersecurity & Information Assurance
- Scrum Master Certified (SMC)

- HAZWOPER Technician Level 3
